Sura Magnets management system scope

Sura Magnets management system assures that delivered products fulfills specified requirements for quality and environmental influence.

The management system is a tool to achieve cross functional work and continuous improvements. The aim of the management system is primary to prevent quality deviations and negative environmental impact. In this way we increase the stakeholder satisfaction. Our main stakeholders are: Customers, suppliers, owners, authorities and personnel.

The Sura magnets management system is limited to the operation that Sura Magnets can influence. Physically this is our plant and office in Söderköping, including loading are in front of plant. Process wise; all work performed in and in direct vicinity to (for example loading/unloading) the plant.
