

Environmental Policy

Sura Magnets AB shall satisfy industrial customer's need of permanent magnets and related products by own manufacturing or selected suppliers.

We shall in our business be a model in the environmental field for employees, owners, authorities, customers, suppliers and other stakeholders.

Sura Magnets AB will achieve this by continuously improve our environmental work and prevent pollution by regularly set new environmental goals and monitor those.

Priority Areas are

- Energy use
- Waste management
- If possible, reuse and increase use of recycled raw materials to an increasingly circular economy

Our choice of material and production processes shall as far as possible be adopted to recycling. We continuously work on reducing resource consumption within the company.

We require the same high level performance from our suppliers, as we do ourselves.

We investigate the environmental impact from products and processes already during design phase.

We see environmental legislation and other requirements as minimum level and do our best to outdo those.

We regularly educate our personnel to improve understanding and knowledge about environmental concerns.
